## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,252,234. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 25 of the cited US patent discloses an exposure apparatus, having an optical system, and a stage device stage device having a planar motor and a vibration isolation structure, as is being claimed in claims 1-19 of applicant disclosure.

3. The cited reference also teaches a method of controlling a stage device, comprising the steps of providing a planar motor which has a fixed portion and a

moving portion; supporting said article on said moving portion for movement in a plane of the planar motor; and providing a vibration isolation structure that is structured and configured to isolate vibration from the moving portion which is induced by a reaction force between said moving portion and said fixed portion, as is being claimed by applicant in claims 20-23.
